Other

Tell us about the action you want to take

Name your action plan

What problem area/s are you targeting

Occupation

Housing

Education

Environment

Health

Women Empowerment

Child rights/ safety

Minority Rights

Mental Health

Other

Provide us with a summary of your ideas/ kind of interventions you are planning

Why are you/your organization targeting the problem area/s you have chosen

Tell us something about the community that will benefit from this action plan

How can we help?

Survey the needs of the community and figure out the most efficient way of implementing our ideas

Refine the ideas we have and create a practical, culturally sensitive and cost effective action plan that our organization can implement

We already have a great action plan that will work for our community, we need help with writing grants and/or a scientific way of measuring if our ideas are really working.

We have several problem areas in our community and have funding available, help us create a plan and measure outcomes.
